Jeff King epitomizes the student-athlete at Virginia Tech. The All-ACC tight end has already graduated with a degree in finance. King will be working on a graduate degree in health promotions during the season.

BUILDING THE MIND AND BODY
- Virginia Tech had 200 student-athletes named to the dean's list at least one semester during 2004-2005.
- Tech student-athletes participate in programs sponsored by the Virginia Tech Athletics Office of Student Life, based on the NCAA/CHAMPS Life Skills program. This is a well-rounded program for student-athletes to develop the individual skills necessary to lead successful and productive lives.
- Tech's strength and conditioning program is regarded as one of the best in the nation, and the outstanding facilities include more than 22,000 square-feet of strength and conditioning training space.
- Tech's Athletic Performance Staff includes a full-time sport psychologist and a sports nutritionist.
The success of Virginia Tech's football program rests largely on the academic progress of each student-athlete. The academic performance of Tech student-athletes has improved each year due in part to the Student Athlete Academic Support Services (SAASS).

The Virginia Tech graduation rate for student-athletes has risen significantly in recent years and is a school-best 74 percent for 2005. This marks the third time in the last four years that Virginia Tech's student-athlete graduation rate has been 70 percent or better.

The Virginia Tech football program has been an integral part of this recent academic success. In the last two years, 29 of the 33 seniors had graduated by the team's bowl game. According to the American Football Coaches Association 2004 graduation rate, Tech has a 70 percent graduation rate as compared to the 59 percent national average. Tech has received honorable mention accolades for the AFCA Academic Achievement Award in two of the past four years.

In addition to posting impressive graduation figures, Virginia Tech's student-athletes continue to excel in the classroom. For the 2004 calendar year, 425 3.0 GPA's were earned by student-athletes, student trainers, student managers, cheerleaders and HighTechs. These student-athletes and students from support areas were recognized at the Athletic Director's Honors Breakfast last spring.

Student-athletes are the most visible student component of a university. They entertain thousands of fans, students and alumni. Their athletic ability and achievement is the primary focus for national media attention. Athletic events bring back not only faithful alumni, but are a welcome mat for potential new students.

Student-athletes devote many hours to practice, conditioning and training that are not required of all students. Due to their time commitment and their high visibility, it is an obligation and in the best interest of the university to supply these students with services which will allow them to maximize their academic potential.

The Virginia Tech Student Athlete Academic Support Services office is committed to providing fundamental and supplemental programming, consistent with University and NCAA policy, aimed at enhancing each student-athlete's educational experience. Stakeholders of the office's mission include student-athletes and their families, the university community, coaches and athletics administrators. SAASS seeks to
develop relationships with its stakeholders that are founded on trust and respect, and provides the following services to accommodate their needs:

- University and NCAA information
- Orientation
- Academic assessment
- The development of an effective student life program
- Appropriate referrals
- Monitored study environments
- Tutorial programs
- State of the art technological learning assistance
- Student Athlete academic performance evaluations

The expectations of the Virginia Tech community are that each student-athlete achieves their maximum academic and athletic potential. With the proper assistance, facilities and encouragement, these potentials can become a reality.

SAASS provides programming for student-athletes from their freshman year through graduation. This includes a comprehensive orientation to Tech, study hall, mentoring, tutoring, academic monitoring, academic recognition and eligibility education. Additionally, student-athletes are referred to and encouraged to take advantage of other campus agencies charged with helping students in their academic pursuits.

In the 2005-06 academic year, the SAASS office will be moving to the West Side of Lane Stadium. Here, student-athletes will have access to state-of-the-art technology, quiet study facilities, individualized tutorial rooms, and direct access to the SAASS staff. This complex will be a focal point for the Athletics Department, both aesthetically and pragmatically, and provide a centralized place for student athlete services.

The new facility features:
- More than 18,000 square feet of functional space
- 10 Staff Offices
- 18 Private Tutor Rooms
- State-Of-The-Art Classroom
- 45 Station Computer Lab
- Three Reading/Study Rooms
- Conference Room
- Reference Library

Together, these spaces provide the student-athlete with a variety of study environments conducive to their success. Athletes can use these facilities between classes, after practice or in the evenings, with flexible hours tailored to make the most of a student-athlete’s limited time.

Chris Helms, in his seventh year at Tech, is the director and is responsible for the development and leadership of the Student Athlete Academic Support Services office.

Colin Howlett begins his ninth year with Virginia Tech and serves as an associate director in the SAASS office.

In addition to assisting the director in all facets of the program, Howlett oversees the advisement of football student-athletes with regard to satisfactory progress, eligibility and degree completion as set forth by the NCAA, ACC and Virginia Tech.

He also helps coordinate support services for the football program, including tutorial support, mentoring, organized study table and major and career counseling. In addition to these responsibilities, Howlett assists in the recruitment, academic evaluation and admissions of prospective student-athletes.

Howlett came to Tech from the University of Maine, where he served for a year and a half as an academic advisor for the athletic department.

Some of his other experience includes academic advisement for student-athletes at Austin Peay State University and the University of Southern Mississippi.

Howlett earned his bachelor’s degree in business administration at Susquehanna University and received his master’s in athletic administration from Southern Miss. A native of Allentown, Pa., he and his wife, Lisa, have two daughters, Natalie and Erika.

Katie Ammons is an assistant director who begins her seventh year and works with the men’s and women’s basketball, men’s and women’s volleyball, and men’s and women’s wrestling.

Beginning his seventh year at Virginia Tech, Chris Helms is the director and is responsible for the development and leadership of the Student Athlete Academic Support Services office. Helms oversees an office comprised of an associate director, four assistant directors, a systems analyst, an intern, and a secretary forming a group of professionals serving the needs of all student-athletes.

In addition to his duties directing SAASS, Helms serves as a liaison between the academic and athletic communities and is an ad hoc member of the University Athletic Committee.

Helms came to Tech from Michigan State University, where he served as the assistant director of the Student Athlete Support Services office.

Prior to MSU, Helms served as the coordinator of academic affairs for the Florida State University football program. Some of his other experience includes academic advisement for student-athletes at Central Connecticut State University.

Helms earned his bachelor’s degree in psychology at Wake Forest University and received his master’s in athletic counseling from Springfield College.

A native of Frederick, Md., he and his wife, Renee, have a son, Walker, and a daughter, Meigs.

Student-athletes, trainers, managers, cheerleaders and HighTechs who achieved a GPA of at least 3.0 are honored at the Athletic Director’s Honors Breakfast each year.

2005 Football
women's cross country and men's and women's track programs. Ammons is also in charge of the operation of the computer labs and other computing resources available for student-athletes. Ammons is a former standout Hokie student-athlete.

Sarah Collins, assistant director, begins her first year as a full time member of the SAASS staff. Collins has undergraduate and graduate degrees from Virginia Tech and has served as SAASS’s intern for the past two academic years. She works alongside Howlett and is responsible for providing academic programming for the freshman football students. Collins is also in charge of coordinating SAASS’s tutorial program.

Drew Scales begins his fourth year with Student Athlete Academic Support Services as an assistant director. Scales provides academic support for student-athletes in lacrosse, volleyball, men’s and women’s soccer and wrestling, in addition to overseeing the mentor program.

Jessica Hegr begins her first year with SAASS and will work with student-athletes from the sports of baseball, softball, men’s and women’s swimming, men’s and women’s tennis, as well as the managers, trainers, cheerleaders and HighTechs.

Terrie Repass begins her 31st year of service at Virginia Tech. She serves as the office secretary and “first contact” person for the SAASS. She is responsible for organizing special events and meetings for the office. Repass prepares all accounting, purchasing and travel transactions for the office.

Another example of Virginia Tech’s commitment to providing its student-athletes with the best academic resources possible is the presence of the Computer Services department, under the direction of Brad Tilley (left) and Brandon Mason.

Because all Tech students are required to own computers, the Virginia Tech athletics department helps its scholarship athletes fulfill that requirement by providing them with state-of-the-art laptops equipped with the most recent software.

In addition to procuring laptops for the athletes, the office also addresses hardware and software needs for the student-athletes and the entire Virginia Tech athletics staff. Both Tilley and Mason are graduates of Virginia Tech.
The Virginia Tech Athletics Office of Student Life is committed to developing the total student-athlete. Director Megan Armbruster is dedicated to enhancing the quality of the student-athlete experience through programs the office administers. The programming implemented by the Virginia Tech Athletics Office of Student Life is modeled after the NCAA/CHAMPS Life Skills Program. The five components are Personal Development, Career Development, Academic Excellence, Athletic Excellence and Community Outreach.

**Personal Development**

Virginia Tech student-athletes obtain personal development education through workshops and mandatory speakers. Presentation topics include gambling, alcohol abuse, sexual violence and healthy relationships, media relations, and manners and etiquette dinners.

The Virginia Tech football team invites numerous speakers to present a variety of topics during fall two-a-day practices and meetings. Topics covered in these presentations include: appropriate campus and community conduct, media relations, sports psychology, drug and alcohol education, sports agent relations, gambling and healthy relationships.

**Career Development**

In close collaboration with the Virginia Tech Career Services Center, career development programs are designed specifically for student-athletes. Resumé design, career fair etiquette, mock interviews, interview attire and mini-career fairs are just a few examples of workshops hosted by the Athletics Office of Student Life. Student-athletes are encouraged to participate in on-campus interviewing and eRecruiting along with securing internships and co-ops during their college careers. In 2005, both Cintas Corporation and NVR Inc., hosted workshops providing student-athletes the opportunity to hear job search strategies directly from employers.

**Academic Excellence**

The Virginia Tech Athletics Office of Student Life is responsible for nominating student-athletes for academic honors and awards. Athletes are nominated for on-campus, Atlantic Coast Conference and national awards. This year, Jessica Morris, a member of the cross country team, was named the Virginia Tech Undergraduate Woman of the Year. Student-athletes with a 3.0 GPA are rewarded each year.

**Megan Armbruster**

Director of Student Life

Megan Armbruster is entering her third year at Virginia Tech as the Director of Student Life. Armbruster is responsible for coordinating new student-athlete orientation, Hokie career development, the “Hokies with Heart” community outreach programs, and serves as advisor for the Virginia Tech Student Athlete Advisory Committee. She also nominates student-athletes for academic honors and awards.

Armbruster serves on a variety of campus committees including the Sexual Violence Prevention Committee, S.A.I.L. (Student Achievement through Involvement and Leadership) Committee, Virginia Tech Orientation Planning Committee, and Hokie Hi Welcome Back Planning Committee. In 2004-2005 she was an instructor for the WING program First Year Seminar. This class is taught to first-year students living in a co-educational environment in the Slusher Hall WING learning community. Armbruster also co-taught the Transitions II class for junior and senior student-athletes who are preparing for the “real world.”

Armbruster was honored by the United Way of Montgomery, Radford and Floyd for ‘Exceptional Dedication.’ She was also presented with an award from the Virginia Tech Women’s Center in appreciation for her contributions to the Violence Against Women Act Grant.

Armbruster came to Tech from the University of Nebraska. At Nebraska, she served as assistant academic counselor at the Hewit Academic Center for Student-Athletes for two years. She earned her bachelor’s degree in community health education in 1998 and received her master’s in educational administration in 2001, both from Nebraska.
several athletes from the Virginia Tech football team have received various academic awards. Thirty-four Hokies made the Athletic Director’s Honor Roll in 2004. Jared Mazzetta was named to the 2004 Virginia Tech All-Academic Team for attaining the highest GPA in 2004 on the football team. Bryan Randall, Jeff King and Brandon Pace were named to the 2004 All-ACC Academic Football Team. The National Football Foundation and College Hall of Fame named Randall to its 2004 National Scholar-Athlete Class. For this distinction, Randall will receive an $18,000 post-graduate scholarship. The ACC recognized Randall by naming him as a Weaver-James-Corrigan Honorary Award winner.

**Athletic Excellence**
The Virginia Tech Student Athlete Advisory Committee (SAAC) promotes effective communication between athletic administration and student-athletes. SAAC is comprised of two representatives from each sport. These representatives meet twice a month to discuss issues and concerns regarding their sports, department of athletics, ACC and NCAA legislation. The student-athletes encourage their teammates to get involved both on campus and in the community. Each year SAAC sponsors a canned food drive during the basketball season. The football team representatives are Cary Wade and Cory Price.

**Community Outreach**
The Athletics Office of Student Life community outreach program is “Hokies with Heart.” Student-athletes are encouraged to volunteer throughout their college experience. In collaboration with the Virginia Tech Corp of Cadets and student leadership, the “Hokies with Heart” program works together with the Montgomery County Public Schools System to visit with local school kids about the importance of education and character development. In 2004, the student-athletes also volunteered with the Montgomery County Christmas Store, Virginia Tech White Ribbon Campaign and Hokies United Tsunami Relief Campaign.

Each athletic team at Virginia Tech is encouraged to select one local charity on which to focus their philanthropic efforts throughout the year. The football team works with the United Way of Montgomery, Radford and Floyd. Football players have participated in a bowling league and summer camp programs with the NRV Agency for Persons with Mental Retardation and the Special Olympics Basketball Tournament. In 2004-2005, Hokie fans supported this partnership by purchasing orange “Team United” wrist bands. This year the Virginia Tech football team presented the United Way with a check for $31,700.

Jessica Hood is entering her third year working in the Office of Student Life. She has been a graduate assistant for the past two years and was recently promoted to coordinator of student life. Her responsibilities include implementing career development, service learning and co-advising the Student-Athlete Advisory Committee. Hood is a former Wake Forest volleyball player and holds a master’s degree in higher education from Virginia Tech.
ATHLETIC PERFORMANCE

There's much more to athletic performance than weight training. Always striving to stay on the cutting edge, Virginia Tech has combined strength and conditioning with nutrition and sport psychology to the benefit of its student-athletes. At Tech, these areas are part of the student-athletes’ preparation — not just for game day, but also for life after college. Virginia Tech tries to provide the best services, facilities and support staff for all of its student-athletes, to make them better athletes and better people.

Strength & Conditioning

One of the nation's top programs helps student-athletes get bigger, faster and stronger!

One of the most important aspects of a successful college football program is its strength and conditioning program. Before the lights ever come on, before the players run out of the tunnel for the first game and before the first touchdown is ever scored for a season, college football players work on getting themselves physically prepared for the rigors of a five-month season.

Thanks to the direction of Assistant Athletics Director for Athletic Performance Mike Gentry, the Virginia Tech strength and conditioning program is among the best in the nation, helping to make the football program one of the best as well.

One of the main support centers of Tech football is the strength and conditioning program. The results of hard work by the staff and the student-athletes have paid huge dividends as the Hokies have pushed their streak to 12 consecutive bowl game appearances.

The football team trains in the beautiful 17,000-square foot training center on the first level of the Merryman Athletic Center. The weight room facility features free-weight equipment, a full line of Hammer Strength equipment, 12 platforms and a 6,000-square foot state-of-the-art speed and agility room.

Tech also has the use of a 10-by-40-yard sand pit located outdoors and adjacent to the weight room. This pit is used for resistive running drills to improve speed. The Hokies also have the practice fields for use in running drills.

Tech football players used to train in the Jim “Bulldog” Haren Weight Room. Located in Jamerson Athletic Center, the 5,000-square foot weight room was officially dedicated in September 1985 to Haren, a former Hokie player and long-time supporter of the Virginia Tech Athletics Department. With the two facilities, the Hokies have more than 22,000-square feet of strength and conditioning training space.

The Tech football strength program centers around four major lifts. The bench press and squat are lifts for building all-around strength; the push jerk and power clean help players develop explosive power. Gentry’s program also includes conditioning and speed development, which the players do in the speed and agility room, Rector Field House (Tech’s indoor practice facility) and on the Hokies’ excellent track facilities.

Each player has personal goals which he works to achieve. The team is broken down into four groups based on the positions that are relevant to the players’ body size. The players work to progress from Maroon, Orange, Hokie, Iron Hokie and Super Iron Hokie status to the Elite Level.

The Elite Level of Performance was created to push the athletes to higher levels. This level is a predetermined performance test which measures achievement for the individual’s position. It comprises four tests in strength (bench press, squat, push jerk and power clean) and five tests in performance (vertical jump, 40-yard time, 10-yard time, sit-reach test and 20-yard shuttle).

Assisting Gentry in the weight room this year are full-time assistant strength and conditioning coaches: Jay Johnson, director of strength and conditioning, Terry Mitchell, assistant director of strength and conditioning, and Jamie Meyer coordinator for strength and conditioning.

Former Tech football player Mike Jackson is a graduate assistant for strength and conditioning.

Marcus Vick executes a power lift using a Tendo unit to measure lift speed. This cutting-edge technology helps develop explosive quickness.

2005 Football
Dr. Mike Gentry
Assistant Athletics Director
for Athletic Performance

Dr. Mike Gentry begins his 19th season as the Hokies’ director of strength and conditioning. As assistant athletics director for athletic performance, his duties include overseeing the strength and conditioning training of athletes in all 21 varsity sports at Virginia Tech. He is directly involved in the training of the football and women’s basketball teams and manages programs for nutrition.

Gentry was named the second-annual Samson Strength & Conditioning Coach of the Year in the March 2005 issue of American Football Monthly.

In May 2003, Gentry was honored by the Collegiate Strength and Conditioning Coaches when he was named a Master Strength and Conditioning Coach. Gentry is currently one of only 36 coaches in the country to have received the CSCC’s highest award.

A native of Durham, N.C., Gentry received his bachelor’s degree in physical education from Western Carolina University in 1979 and received his master’s from the University of North Carolina at Chapel Hill in 1981. He received his doctorate in curriculum and instruction, with an emphasis in motor behavior, from Virginia Tech in 1999.

Gentry worked as an assistant strength coach at UNC and as the head strength coach at East Carolina University prior to coming to Virginia Tech in 1987.

In 1995 and 1996, Gentry was recognized by the National Strength and Conditioning Association as a finalist for the National Strength and Conditioning Professional of the Year. Gentry has a son, Roy Christopher, 15.

Coach Gentry’s Philosophy

“Since 1987, our strength and conditioning program has developed a tradition. We have a team dedicated to training hard and striving for excellence. The younger student-athletes see the upperclassmen’s intensity and it makes everyone want to train to be one’s best. Our strength and conditioning program is designed to help our student-athletes build overall strength, power and stamina, while helping them develop self-discipline and realize their potential as athletes. We have a comprehensive program utilizing strength/power training, plyometrics, functional conditioning and flexibility training. Our goal is to become one of the most physical teams in the nation.”

**Virginia Tech Hokies**
Virginia Tech offers another important service to all its student-athletes — sport psychology. Dr. Gary Bennett coordinates the sport psychology department, which offers psychological and performance enhancement services for student-athletes. Bennett also works closely with the Cook Counseling Center.

Bennett meets with student-athletes on an individual basis for personal counseling and to discuss the mental aspects of the game. He also works on team building, communication and performance enhancement.

Mike Gentry, assistant AD for athletic performance, says, “I’ve always felt that (sport psychology) was an important element. We want to be a holistic model of an athletics department, and we wanted to and needed to include sport psychology in that model.”

“We try to address all the various factors that affect student-athletes’ performance on and off the field,” Bennett says. “We believe we can help athletes perform better by addressing those concerns.”

The sport psychology department also offers an injury group to afford injured athletes the opportunity to meet with other injured athletes and talk about their recovery process. Injured athletes may also meet individually with the sport psychologists if they do not feel comfortable in the group or cannot make the sessions. On average, the psychologists conduct 20 individual sessions per week and also meet weekly with teams as the need arises.

A new addition to the sport psychology resources is the Dynavision 2000, a unique conditioning and training program designed to increase focus and concentration, improve coordination and visuomotor reactions, and increase peripheral awareness. Virginia Tech is privileged to be one of only a handful of schools with this cutting-edge technology.

The response to the sport psychology program has been very positive. The student-athletes are very receptive to the services offered by the doctors. The sport psychology office reaches out to athletes who may not have considered going to the counseling service that is offered to all students at Virginia Tech.

“It is a great resource for our coaches and our athletes,” Gentry says. “We’ve improved a lot in areas of strength and conditioning, nutrition and in sport psychology. It’s all about becoming a well-rounded athletic program and helping student-athletes. We want to give them all the resources we can, to put them in a position to be successful.”

Dr. Gary Bennett
Sport Psychologist

Dr. Gary Bennett is in his sixth year as the sport psychologist for the Virginia Tech Athletics Department. The Lexington, Ky., native began working at Virginia Tech in 1995 at the Cook Counseling Center. In addition to seeing students in therapy, Bennett has taught and supervised pre-doctoral level interns.

In athletics, Bennett also serves on the substance abuse committee and the planning committee for the “Summit for Student-Athlete Success” events. The 46-year-old also does work with various teams in the area of performance enhancement.

Bennett received a B.A. in English from Centre (Ky.) College in 1981, where he played baseball. He was awarded a Master's in rehabilitation counseling from the University of Kentucky in 1988 and received a Ph.D. in counseling psychology from UK in 1995. Bennett is licensed as a clinical psychologist and has additional training in sport psychology.

Bennett lives in Blacksburg and enjoys playing golf and basketball, as well as hiking and skiing in his spare time.
Eating healthy and choosing nutritious diets are important aspects of a Virginia Tech student-athlete’s life, and that’s why in July 2002, the athletics department implemented the sports nutrition program. Amy Freel serves as the director.

Freel works individually with student-athletes to provide them with information they need on their diet. She also provides individual players with diet counseling on issues such as gaining lean muscle mass, losing body fat, and eating choices to improve performance.

She also designs preseason menus, snacks and training table menus for the football team. “It is extremely beneficial for our student-athletes to have nutrition education and counseling available to them in order for them to remain successful in their sports and outside of athletics,” Freel said. “The individualized nutrition education allows me and the athletes to get very specific on their nutritional, personal and sport-specific goals.”

The sports nutritionist works with the “Training Edge,” a dining option for health-conscious students and athletes, to design menus for training tables and daily menu selections.

Also in July 2002, the Virginia Tech Athletics Department purchased the BOD POD body composition system. Tech is one of a handful of college athletic departments using this type of technology. The BOD POD is found in many professional training facilities, such as the NFL and Major League Baseball. It accurately measures body composition (percent of body fat, lean muscle mass and fat mass) through air displacement within five minutes. Research has shown that an increase in lean muscle mass will increase athletic performance. The Sports Nutrition Program has helped countless Tech athletes maximize their athletic performance.

Amy Freel
Director of Sports Nutrition

Amy Freel enters her fourth year as the sports nutritionist in the Virginia Tech Athletics Department. Prior to serving as the nutritionist, she served as the coordinator of student life for a little more than two years.

In 2005, she was named the Young Dietician of the Year by the Virginia Dietetic Association for her work as the nutritionist in the Tech athletics department.

Freel, a native of Glen Ellyn, Ill., received her undergraduate degree in dietetics in 1996 from Ball State University in Muncie, Ind., while competing in gymnastics for four years. She became a registered dietitian in 1997 and earned her master’s degree in dietetics from Ball State in 1998.

After graduation, Freel served as a clinical dietitian at the Lewis-Gale Medical Center for a year-and-a-half before coming to Tech in September of 1999. She became the full-time director of sports nutrition in July 2002.

Her husband, Mike, works for Virginia Tech Recreational Sports. The couple and their two children, Ben (4) and Matt (3), live in Christiansburg.

The BodPod (above) is a great tool for measuring body composition and maximizing potential. Amy Freel (left) talks with Brenden Hill and Cory Holt about food choices and serving sizes in her Merryman Center office.
The Virginia Tech Sports Medicine Department is an ever-changing and developing unit that strives to provide the most current and comprehensive care to all student-athletes. The department is constantly evolving to incorporate new ideas and state-of-the-art resources for the betterment of student-athletes.

A professional staff — including primary care physicians who are Board certified in family medicine and sports medicine, orthopaedic surgeons, certified athletic trainers, physical therapists, chiropractors, massage therapists, sport psychologists, nutritionists and orthotists — is available to manage the health care of Tech athletes. As part of the evolution, Tech recently completed its fourth full year in the 4,300-square-foot Eddie Ferrell Memorial Training Room. This area consolidated the training rooms that existed in the Merryman Center and Cassell Coliseum. The facility gives the training staff a centralized area to care for the needs of all Virginia Tech student-athletes. There is top-of-the-line equipment and a unique style of architecture, developed by Glenn Reynolds, AIA and Larry Perry as the consulting engineer.

The Ferrell Training Room, which nearly doubles the size of the former Merryman Center facility, also allows the staff to utilize that room for physical therapy, chiropractic care and massage therapy. With its completion, Virginia Tech now has more than 10,000 square feet dedicated to sports medicine, placing Tech in the top five percent nationally. In addition, the $10 million Merryman Center, a state-of-the-art facility that includes 2,400 square feet of medical space, supplements the new training room. This treatment room has numerous treatment modalities, including portable X-ray, electric stimulation, ultrasound, hot and cold packs and a lumbar/cervical traction unit. It also has offices for the staff, dozens of training tables, two cold tubs, whirlpools, an underwater treadmill, a Biodex System 3 and various other pieces of rehabilitation equipment. In addition, a training room has been constructed in Rector Field House to serve the football team when it practices indoors.

“We, as a staff, are very pleased with our facility and the opportunity for all of us to come together for the benefit of our athletes,” said Mike Goforth, director of athletic training.

In the Eddie Ferrell Memorial Training Room, Dr. Marc Seigel reviews digital radiographic images with an injured athlete using one of the two new physician’s work stations provided by a gift from the Charles Gordon, Jr., family.

Dr. Delmas Bolin and Dr. Greg Tilley team up to assess performance issues related to Vince Hall’s low back and spine prior to weight room testing.
The Virginia Tech Sports Medicine Department, in conjunction with the Via College of Osteopathic Medicine and other research departments at Tech, has also initiated several new research projects focusing on head injuries, ankle injuries and the treatment of low back conditions. The head injury study, titled B.I.E.R.S.T. (Brain Injury Evaluation in Real Time Sports Trauma), started two seasons ago and is an exciting new pilot study that evaluates the forces generated in helmets during real-time events in football. The project is headed by Dr. Gunnar Brolinson and Stephan Duma from mechanical engineering and has steadily gained the attention of both the medical and engineering communities.

The range of benefits athletes have access to include custom orthotics, custom mouth guards, specialized DonJoy prophylactic bracing and many other options to help prevent or protect them from injuries. The sports medicine staff also takes great pride in treating the athlete year-round. Special attention is paid to off-season activity. During this time, the staff will analyze past injury data from each participant and construct a preventative program that is followed over a nine-week period between the end of the season and the beginning of spring practice. This same procedure is followed during the summer.

“If our strength and conditioning is so important, and it is, then we owe it to our athletes to provide them with the necessary resources to keep them actively participating,” Goforth said. “We basically adopt the attitude that in the fall, our mission is to keep them participating on the field and during the other times of the year, it is our job to keep them participating in our strength and conditioning program.”

Their programs consist of strengthening, stretching and most importantly movement pattern analysis and training to help prevent the re-occurrence of injuries.

“We value the off-season greatly within our department,” Goforth said. “We have adopted the same mindset as our strength and conditioning staff and look at our off-season time as an opportunity to get our athletes better as opposed to time off for our staff.”

Most of the off-season activity is based on programs that are designed to detect movement patterns that might lead to injury or could be causing a drop in performance.

A vital part of student-athletes services is the access to the Schiffert Student Health Center in McComas Hall. A health center and counseling services are available on one side of McComas Hall, while recreation sports and fitness programs are available on the other. The center also has a fully operational diagnostic laboratory, X-ray facilities and eight full-time physicians.

If physical therapy is needed, student-athletes can be seen by therapist Mark Piechoski in the Ferrell Training Room. Piechoski, who is a certified athletic trainer, physical therapist, and strength and conditioning specialist plays a large role in the overall program developed to return the injured athlete back to 100 percent. In addition, staff sport psychologist Gary Bennett is available to all student-athletes for personal and performance issues. Virginia Tech also has the services of Dr. Greg Tilley, team chiropractor. Tilley provides Tech athletes with specialized treatment for spine-related conditions and also plays a huge role in performance enhancement through various chiropractic techniques.

“For us as certified athletic trainers, to have the resources of folks like Mark Piechoski, Greg Tilley and Gary Bennett is a tremendous asset,” Goforth said. “The knowledge and skill that they bring is invaluable.

“Our goal is to provide the same high level of health care that professional and Olympic athletes receive,” Goforth continued. “Our usage of specialist care is modeled after the NFL system and incorporates components of the Olympic Training Center in Colorado Springs.”

Team orthopaedic surgeons Dr. Marc Siegel and Dr. Scott Urch bring a wealth of experience and skills to assist when athletes need orthopaedic surgery to repair certain types of sports-related injuries that occur from time to time.

Tech also maintains a special relationship with Montgomery Regional Hospital. Montgomery Regional Hospital is the choice for state-of-the-art equipment to perform surgeries, diagnostic imaging and processing of laboratory requests.

This year, the staff will consist of three graduate assistant athletic trainers who all have professional or collegiate experience — Nate Miller (Cleveland Browns), Dave Dietter (New Orleans Saints) and Richard Stewart (Baltimore Ravens).

Over the past 10 years, Virginia Tech has developed the reputation for producing top-level certified athletic trainers. Graduates are now employed in various levels of the profession.
Mike Goforth
Director of Athletic Training

Mike Goforth is in his sixth year as the director of athletic training and seventh year on Tech’s athletic training staff. Goforth came to Tech from the Hamilton Medical Center/Bradley Wellness Center in Dalton, Ga., where he was the director of wellness and sports medicine.

He has an extensive background in sports medicine, working at East Tennessee State University, Virginia Tech, William Fleming High School, Tusculum College, Greene County Sports Medicine/Industrial Cooperative and Pioneer Sports Medicine/Physical Therapy Clinic. He also has numerous opportunities to consult on program development throughout the country.

Goforth graduated from East Tennessee State University in 1991 with a bachelor’s degree in physical education with a concentration in athletic training. He earned his master’s in sport management from Virginia Tech in 1995 and is currently pursuing his doctorate in health education, also from Virginia Tech.

Kevin Domboski
Assistant Athletic Trainer

Kevin Domboski is entering his second year as the assistant athletic trainer for football. Domboski was a graduate assistant for two years with Tech’s Sports Medicine department working with football and lacrosse prior to being hired full time.

He has gained valuable experience while working three training camps with the Baltimore Ravens as a summer intern since 2000.

Domboski, a certified athletic trainer, graduated from Salisbury University in 2002 with a bachelor’s degree in athletic training and physical education. He earned his master’s in health promotions from Virginia Tech in 2003.

Domboski and his wife, Kathy, reside in Christiansburg. He enjoys spending his spare time outdoors and on the golf course.
College football keeps getting more and more competitive, and each school is looking for something that will give it an advantage. While star athletes, weight training and practice make a big difference, Virginia Tech has something that puts it over the top — Pinnacle System 5.0.

The system is regarded as the best in the country. NFL teams use it. Many college teams wish they had it. Tech does.

The Tech video department, under the direction of Kevin Hicks, has one of the most state-of-the-art video systems in the country, and has expanded its operations to include all the equipment the team needs to be on the cutting edge of video study.

This state-of-the-art video equipment has prepared the Hokies for any possible scenario they may come across in any game. And it’s not just available on game days. The equipment is available 24 hours a day, seven days a week and coaches and players can even use laptop computers to watch video while they are away from the Merryman Center.

What makes this system so potent is the convenience of having all the equipment the team needs to be on the cutting edge of video study.

This state-of-the-art video equipment has prepared the Hokies for any possible scenario they may come across in any game. And it’s not just available on game days. The equipment is available 24 hours a day, seven days a week and coaches and players can even use laptop computers to watch video while they are away from the Merryman Center.

What makes this system so potent in terms of preparing a team for a game is convenience, convenience, and convenience.

Here’s how the system works. Tape is gathered with video of opponents’ games. Then, video coordinator Tom Booth, along with the graduate assistants, label each play in terms of down, distance, formation, protection, play result and 15 other factors.

This information matched alongside the video, is entered into the computer. Once this is done, the coaches and players can access any situation with a click of the mouse. With computers in all coaches’ meeting rooms, they can instantaneously have video footage of any scenario that they can dream up of Tech opponents or even the Hokies themselves.

What has Virginia run on second downs when the ball is placed on the right hash mark? Click, click. How many pass plays has Miami run with an ACE backfield? Click, click. It’s all available any time someone wants to view it.

The system gives the coaches an option block that they use to punch in these scenarios. After the coach chooses the situation, the video is queued up in a matter of seconds.

This new program definitely preferred by the video staff. The old way consisted of taking the game film without the use of a personal computer and then cutting it up into different segments to make more films. This was an all-night job that lasted into the early hours of the next morning.

Kevin Hicks
Director of Video Operations

Kevin Hicks has wasted no time moving up the ranks in the Tech video office. After spending four years as a student intern, while pursuing his degree in communication studies from Tech, the Yorktown, Va., native was hired in May of 1998 as the assistant video coordinator. Within a year, Hicks moved up to head video coordinator. He is currently the director of video operations.

As director of video operations, Hicks has numerous duties. Supervising undergraduate students, helping coaches with video to prepare for upcoming games, producing highlight videos for each sport and running the video board at Lane Stadium are just a few of Hicks’ responsibilities.

Born in Newport News, Va., in 1976, Hicks graduated from Tabb High in 1994. Hicks and his wife, Kristen, reside in Blacksburg. In his spare time, he enjoys playing volleyball and softball.
The staff in the videography department takes pride in what they do for the football staff. “We are a big part of the football team, in that we are there every day — taping practice, traveling with them on the road and attending every game,” says Hicks. “Seven days a week we are here with football, so when they win you feel like you are a part of that.”

“We feel like part of the team,” Booth says. “Everyone helps out with the team to do their part. We help the coaches to see the things they need to see, especially when it comes to breaking down the opponents’ tapes.”

The update in technology not only means an improved program but also improved video-viewing options. Each of the individual position meeting rooms has a pull-down projection screen and a video projector connected to a computer to display scouting material, where players or coaches can access the footage any time they want it. The student videographers also tape every single practice, which can be viewed by the coaches at the click of a button. This helps the team prepare for games, and also gives the coaches access to plays they need.

“It’s been a great tool,” Tech defensive coordinator Bud Foster says. “Besides the quality and convenience, it’s right there at your fingertips. Players at this level have to realize that there is a lot more involved than just playing the game. The average person doesn’t know all the preparation that’s involved.”

The equipment has been used the past couple years to help give Tech that extra edge, in both regular season and bowl games. An example of the program’s presence came in the Hokies’ bowl game against Auburn in last year’s Sugar Bowl. In the days leading up to the game coaches were given laptops by the videography department that contained hours of Auburn video that the coaches could view at their convenience. Each position had its own meeting room in the hotel with a laptop set up so the players could watch video of practice or Auburn 24 hours a day. Being able to transport game video with relative ease gives the Hokies an advantage, even on the road.

“The greatest teaching tool is the ability to show someone what they’re doing, right or wrong,” head coach Frank Beamer says. “With our video equipment, we can do that quickly. The ease with which we can do these things and the way we can put certain plays and scenarios together makes us more efficient in getting ready to play a game on Saturday.”

While the practice video is great for players and coaches, fans are also reaping the benefits of the video department’s hard work. HokieVision was added five seasons ago to the delight of fans.

Did you miss that acrobatic touchdown grab by Eddie Royal or that big hit Darryl Tapp just put on the opposing quarterback? Relax. Just look to the sky and you can receive instant gratification from the video scoreboard located in the north end zone of Lane Stadium.

The HokieVision crew uses five cameras to cover all of the action in Lane Stadium, along with four replay machines to help out with the operation of the video scoreboards. The videography department also has four editing stations that aid in editing and production of in-game entertainment. The video staff produces and directs the games from the control room in the Merryman Athletic Center. For the 2005 season, the control room has been completely revamped to coincide with the installation of a new 16:9 video board that will provide larger-than-life replays. The control room will be completely digital providing a better, clearer and more reliable picture than ever before.

There has been nothing but positive reaction to the video boards that have been placed in both Lane Stadium and Cassell Coliseum. “People like seeing the replays, and people especially like the crowd shots. Fans love to see themselves on the board,” Booth says.

The addition of the new equipment has produced the need for more staff. In addition to Hicks and Booth, Brian Walls also works full-time in the video department. There are also five undergraduate student assistants: Brian Davenport, Michael Russell, Megan Caliguri, Laura Prangley and Lauren Sensabaugh; and graduate assistants Eric Frey and Cameron Miller. Hicks will hire about eight to 10 other people on a game-by-game basis to work with the video board during football season.
From the blue waters of the Chesapeake Bay to the hills of Tennessee, the Virginia Tech Hokies are on the air!

That familiar refrain — delivered by Bill Roth, the Voice of Virginia Tech football — opens every Tech sports broadcast and reflects the network’s goal of reaching Hokie fans everywhere. So, whether they’re sailing off Virginia’s eastern shore, hiking in the Blue Ridge Mountains, or sitting in their homes anywhere throughout the Commonwealth, Tech fans know they’re always within range of a Tech network radio station.

With a massive network of radio and television stations throughout the region, the Virginia Tech ISP Sports Network serves as the main communications link between Tech’s football program and the Hokies’ avid legion of fans.

In addition to game broadcasts, ISP Sports also produces The Advance Auto Parts Hokie Hotline, a two-hour radio talk show featuring Roth and Tech coach Frank Beamer every Monday night. The Davenport Virginia Tech Sports Quiz, a daily two-minute program, airs on radio stations every weekday from August through March. And the network’s award-winning television magazine show, Virginia Tech Sports Today, presented by the University Bookstore and Volume II Bookstore, is seen every Sunday on a network of TV stations and cable networks throughout Virginia and the southeastern United States.

Roth — a six-time winner of Virginia’s Sportscaster of the Year Award — is in his 18th season as the Voice of Virginia Tech football and basketball. A native of Pittsburgh, Pa., Roth graduated from Syracuse University in 1987, earning a degree in broadcast journalism. He also won the distinguished Robert Costas Academic Scholarship in 1986.

During the off-seasons, Roth has worked for ESPN in a variety of roles, including calling play-by-play of NCAA Lacrosse, baseball, basketball, kick boxing and field hockey. Roth’s cries of “TOUCHDOWN TECH!” have become a favorite of Hokie fans of all ages and his accurate and exciting descriptions of Tech football and basketball have made him one of the most popular figures on the Tech athletic scene.

“Tech football coach Frank Beamer is the leader of the Hokie Nation, and assistant coach Bud Foster is the Minister of Defense, then some might call Roth Tech’s Secretary of State. ‘He’s very much a part of what we’re all about here,’ Beamer said. ‘When you hear his voice, you immediately think Virginia Tech football,’ wrote Howard Wimmer of the Hokie Digest.

If football coach Frank Beamer is the leader of the Hokie Nation, then the Hokies’ Countdown clock starts 60 minutes before kickoff with a complete preview of the game, interviews with Tech coach Frank Beamer and the opposing head coach, the ACC Report with Tony Luftman, late-breaking news, and features such as Great Moments in Virginia Tech History presented by the University Bookstore, The Roth Report, Ford Inside Scoop, ACC Traditions presented by Virginia Farm Bureau Insurance.

The perfect tailgating companion, the Hokies’ Countdown clock starts 60 minutes before kickoff with a complete preview of the game, interviews with Tech coach Frank Beamer and the opposing head coach, the ACC Report with Tony Luftman, late-breaking news, and features such as Great Moments in Virginia Tech History presented by the University Bookstore, The Roth Report, Ford Inside Scoop, ACC Traditions presented by Virginia Farm Bureau Insurance.

That familiar refrain — delivered by Bill Roth, the Voice of Virginia Tech football — opens every Tech football game since 1975. Roth — a six-time winner of Virginia’s Sportscaster of the Year Award — is in his 18th season as the Voice of Virginia Tech football and basketball. A native of Pittsburgh, Pa., Roth graduated from Syracuse University in 1987, earning a degree in broadcast journalism. He also won the distinguished Robert Costas Academic Scholarship in 1986.

During the off-seasons, Roth has worked for ESPN in a variety of roles, including calling play-by-play of NCAA Lacrosse, baseball, basketball, kick boxing and field hockey. Roth’s cries of “TOUCHDOWN TECH!” have become a favorite of Hokie fans of all ages and his accurate and exciting descriptions of Tech football and basketball have made him one of the most popular figures on the Tech athletic scene.

As a broadcaster by shining as the analyst on Tech’s basketball games, he worked as a network analyst. Roth, a star for the Hokies in the early 1970s, was inducted into Virginia Tech’s Hall of Fame in 2000.

In addition to his role as an analyst, Roth handles all post-game interviews from Tech’s locker room. He’s showed his versatility as a broadcaster by shining as the analyst on Tech’s basketball broadcasts over the years.

Together, Roth and Burnop comprise one of college sports longest-running broadcasting teams, having described the action of every Tech football game since the 1988 season.

Tech radio broadcasts are available to fans anywhere in the world via Tech’s official Web site (hokiesports.com). Again this year, several Tech games will be aired on Armed Forces Radio to U.S. Military personnel and their dependents throughout the world. In addition, Tech games can be heard on XM Satellite Radio.

(as of June 1, 2005)
ISP Sports, a national leader in the collegiate sports marketing industry, is in its 10th year as the exclusive worldwide multi-media and advertising rightsholder for Virginia Tech Athletics. In this partnership with the athletics program, ISP develops, produces and sells an extensive range of sports marketing opportunities for Tech, including radio play-by-play and call-in shows, television coaches shows and live events, Lane Stadium and Cassell Coliseum venue signage and print and Internet advertising.

The partnership between ISP Sports and Virginia Tech Athletics is ongoing. In November 2002, the two sides reached an agreement to extend their relationship through April 2006. "ISP Sports is excited and pleased to extend our relationship with Virginia Tech and an athletics program that is the equal of any in America," said Ben Sutton, president and CEO of ISP Sports. "We have enjoyed an excellent relationship with the university in the past and are confident that our partnership will continue to grow stronger in the future."

ISP, which is based in Winston-Salem, N.C., was founded in 1992 by Sutton. During its very successful partnership with Virginia Tech, ISP Sports has developed the Virginia Tech ISP Sports Network into the largest collegiate sports radio network in Virginia. Broadcast coverage includes the commonwealth of Virginia, as well as portions of Maryland, North Carolina, Tennessee, Kentucky and West Virginia.

In addition to the live network broadcasts, ISP produces The Hokie Hotline, a live weekly 90-minute call-in show featuring Tech head coach Frank Beamer and his staff during their season. ISP also keeps Hokie fans involved throughout the year with daily reports that air statewide from August through March. ISP's television coverage of Tech Athletics is centered around Virginia Tech Sports Today, a weekly magazine show aired on a network of affiliates throughout the region, including Comcast SportsNet. The 30-minute show features an action-packed, magazine-style format, and with its superior production, animation and videography, has the look and feel of a national sports telecast. Virginia Tech Sports Today airs from mid-August until mid-March.

Other advertising and marketing opportunities represented by ISP Sports include the state-of-the-art video screens ("HokieVision") in both Lane Stadium and Cassell Coliseum. Pregame hospitality events during football season are another very popular item managed by ISP Sports.

The company also provides a wide variety of sponsorship opportunities for Tech supporters at every level with print advertising in the football and basketball game programs and the official athletics newspaper (hokiesports the newspaper).

ISP Sports is presently the exclusive rightsholder for:
- Alabama-Birmingham
- Auburn
- Baylor
- Boston College
- California
- UCLA
- Central Florida
- Cincinnati
- Georgia
- Georgia Tech
- Houston
- Marshall
- Ohio
- Pittsburgh
- Southern Mississippi
- Syracuse
- Tulane
- Vanderbilt
- Villanova
- Virginia Tech
- Wake Forest

Additionally ISP is a joint venture partner with Learfield Communications as the multi-media rightsholder for the athletic programs at:
- Alabama
- Clemson
- Miami
- South Carolina

ISP Sports — Virginia Tech Staff

- Mike Wolfert is in his sixth year with ISP, serving as vice president and general manager for the company's Virginia Tech property. His duties include sponsorship sales and development, office management and serving as the primary liaison with the Tech Athletics Department administration. Wolfert is a graduate of Indiana University and holds a master's in sports administration from Ohio University.

- Rick Barakat is in his second year as an associate general manager with the Virginia Tech staff. In that role, he assists in all administrative, sales and management duties involving the Hokies. Barakat has built a solid background in sports marketing with established companies such as Raycom Sports, ACC Properties and GMR Marketing in Charlotte. He is a 1996 North Carolina graduate and holds a master's in sports management from Georgia.

- Josh Bullock is in his second year with the Virginia Tech staff, having accepted his position as an associate general manager in April of 2004. He came to Blacksburg after a very successful three-year tenure as an account executive for Clear Channel Communications in Cincinnati. Prior to that time, he served as an athletic relations coordinator and recruiting assistant in the University of Kentucky football program. Bullock is a graduate of UK with a degree in sport management.

- Adam Raak joined ISP in June 2004 and is now an assistant general manager with the Blacksburg staff. He holds a degree in marketing from Michigan State and a master's in athletic administration from Indiana University. Raak has also worked for Reebok, where he was a marketing representative in Chicago.

- Chris Ferris, a 14-year veteran of the ISP staff, currently serves as vice president of radio operations. His responsibilities include supervision of all programming and syndication of the ISP Sports radio networks. Ferris is a 1987 graduate of the University of North Carolina.

- Jamie Frye is in her ninth year as the radio and television network manager of ISP. Her duties include affiliate relations for the nearly 300 radio and television stations which make up the ISP Sports Networks. Frye is a graduate of UNC Greensboro.

- Taylor Durham has a vital responsibility with the Virginia Tech ISP Radio Network as recruitment manager for all Hokie affiliates. The Elon College graduate joined ISP five years ago and has been a positive factor by bringing new stations into the ISP fold.

(as of June 1, 2005)
Regardless of where they are, Virginia Tech sports fans have the luxury of getting up-to-date information on their favorite Tech sports or athletes on a daily basis. hokiesports.com is every Tech fan’s source for fast, accurate and official coverage of all Hokie sports teams and events.

hokiesports.com is the lead site of six official Virginia Tech athletics auxiliary sites. These include hokiephotos.com, hokievtv.com, hokietickets.com, hokiepages.com and hokieshop.com. There is also a direct link to the popular on-line version of hokiesports the newspaper.

hokiephotos.com allows fan to purchase select athletics department photos of some of the most memorable athletes and moments in Virginia Tech history. hokievtv.com provides streaming video clips that are exclusive to the site. Coach and player interviews and video coverage of events that are one-of-a-kind are available.

hokievtv.com broadcasts the weekly Hokie Hotline radio show, football media conferences and postgame interviews in the live streaming format for the 2005 season.

hokieTickets.com contains links and updates about tickets for Hokie athletics events, while the popular hokiepages.com provides the user with great wallpapers to add to their computers, extra photo scrapbooks, on-line greeting cards and many new features which change every day.

On the main site, hokiesports.com, one can find an array of information on Tech athletics. Through the efforts of the sports information department, pregame releases, game stories and individual features, as well as up-to-date statistics and results for all 21 athletic teams are posted, providing the fastest, most complete source for Hokie news on the Web. Other offerings include individual home pages for each Virginia Tech sport.

Breaking news and archived releases can be found, along with media guides containing player and coaching staff profiles, schedules, records, historical information and other pertinent facts for every sport.

Also, accessible on every sport’s home page are the rosters, with links to player bios, schedules and results, as well as conference standings. With fast “live stats,” fans can view home football, men’s and women’s basketball, baseball, softball, men’s and women’s tennis, volleyball and wrestling stats as they happen via the Web.

The in-house site was launched on Nov. 29, 1999. Since August 2003, hokiesports.com has averaged more than one million unique visitors per year.

The site is managed and designed by Damian Salas, webmaster. Student interns and workers assist with the site.

hokiesports the newspaper
In-house publication provides in-depth coverage

Tech enjoyed its first season in the ACC and one entity brought fans coverage of all 21 sports every step of the way during the Hokies’ inaugural season in their new home — hokiesports the newspaper.

But then, the newspaper has been doing this for Tech fans for more than 20 years. Formerly The Hokie Huddler, the idea of a newspaper came about in 1984 when then director of athletics and football coach Bill Dooley wanted an in-house publication devoted to coverage of all of Tech’s sports, primarily football. Since then, the newspaper has undergone numerous changes, including a name change and a move to the Internet. But providing accurate, timely and quality information remains the constant for the newspaper staff.

Today, there are more than 7,500 devoted subscribers to the print version, and almost 200 registered for the on-line version of the paper, which became available to Hokie fans in the fall of 2000. hokiesports the newspaper is a colorful publication that is printed 33 times per year (weekly during football and basketball seasons and bi-monthly during the spring). The newspaper consists of the ever-popular “Insider” section, which is a page of short blurbs of interesting “inside” information — things one won’t get anywhere else.

With hokiesports the newspaper being owned by the athletics department, it allows the staff to be closer to coaches and players to get that inside information. Most sports publications of this kind are independent of their school’s athletics departments.

The up-to-date news provided in the paper is primarily on football, men’s and women’s basketball and baseball. Fans can get the depth chart (during the football season), features on players and former athletes (the ‘Where are They Now?’ section), statistics and standings, notes and quotes and recruiting profiles on football, men’s and women’s basketball recruits, along with information about other sports recruits as well.

Jimmy Robertson, a 1994 graduate of Roanoke College, serves as the editor of the publication. Robertson has been the editor for nine years and has won four national awards, including two in 2004 when his feature on former Tech tailback Kevin Jones was voted the “Best Football Feature” by the College Sports Publisher’s Association and his story on international student-athletes was voted the “Best Olympic Sports Feature” by CSPA.

Matt Spiers, a native of Richmond and a 2000 graduate of Virginia Tech, has been the assistant editor since 2000 and handles the layout and design of the publication, while also covering women’s basketball and writing features.

Veteran photographer David Knachel, who began working on the paper in 1985, takes all the photos and designs the cover for each issue. Bill Roth, the Voice of the Hokies, is a weekly guest columnist.

For the printed version of hokiesports the newspaper, a one-year subscription costs $37.95, while a two-year subscription costs $69.95. For an additional $12 per year, fans who subscribe to the print version can access the on-line version. Or, for $25 annually, fans who don’t subscribe to the print version can view the entire newspaper via the Internet.

Also, newspapers are available on newsstands at certain convenience stores through the Blacksburg-Christiansburg area. For additional subscription information, call the hokiesports the newspaper office at (540) 231-3908, or visit the Web site at www.hokiesports.com.
The inaugural season in the ACC was the best ever for the Virginia Tech Athletic Fund as donors contributed $20 million in support of the athletics program. The Hokie Club is charged with raising funds to support the scholarship, capital and programmatic needs of the Athletics Department.

“Virginia Tech’s high national profile in football continues to motivate our fans in their support of the program. They are proud that their football team has been to bowl games in each of the last 12 years, including four BCS games. Our move to the ACC has generated additional excitement and, as a result, additional support,” said Lu Merritt, who has served as director of the Athletic Fund since 1994.

Donors make gifts in outright forms such as cash and real estate, or through planned or deferred gifts such as a will or retirement plan.

The Athletic Fund is proud of its staff and its volunteers who help ensure that 65 Hokie Clubs throughout the region continue their active efforts to support and promote athletics at Virginia Tech.

John Clary of Lawrenceville, Va., is the current president of the Athletic Fund and Renny Lynch of Roanoke, Va., is the vice president.

These added perks have naturally translated into larger membership numbers for the Club. However, Whitenack wants to see those numbers continue to grow, particularly among recent graduates. A one-year membership costs $40. A five-year membership costs $160, and a lifetime membership costs $800.

So if you are a former Hokie athlete, trainer or manager, contact Whitenack to join the Monogram Club at 540-231-9156 or rwhitenack@vt.edu. It is one of the best values in Tech athletics, and it is the department’s way to keep saying thank you for your service to the university.
INFORMATION FOR PROSPECTS AND THEIR PARENTS:

Compliance with NCAA rules is a never-ending process that requires diligence on the part of both the Department of Athletics and Virginia Tech as a whole. Below is a brief summary of the basic issues that you may be faced with as a prospective student-athlete.

1. For NCAA rules purposes, you become a prospective student-athlete once you have started classes for the ninth grade.

2. A “representative of an institution’s athletics interests” (commonly referred to as a booster) is defined by the NCAA as anyone who:
   • Is now, or previously has been, a member of any organization promoting the institution’s intercollegiate athletics program;
   • Has made a financial contribution to the athletics program or an athletics booster organization;
   • Has helped arrange any employment for a student-athlete;
   • Has been involved, in any way, in the promotion of the athletics program.

3. Please be aware that any former Virginia Tech student or former or current member of the Hokie Club is automatically considered a representative of Virginia Tech’s athletics interests (booster). According to NCAA rules, once an individual is identified as a booster, he/she retains that status forever.

4. A booster may not solicit your enrollment in any manner (no phone calls, letters or in-person encounters).

5. It is not permissible for you (or your family) to receive any benefit, inducement or arrangement such as cash, clothing, cars, improper expenses, transportation, gifts or loans to encourage you to sign a National Letter of Intent or to attend any college.

6. A “contact” is any off-campus, face-to-face encounter between you or your parent(s) or legal guardian and a member of a college coaching staff during which any dialogue occurs beyond an exchange of greeting. NCAA rules do not permit contacts until July 1 prior to a prospect’s senior year.

7. An “evaluation” is any off-campus activity by a member of a college coaching staff designed to assess your academic qualifications or athletic ability, including any visit to your high school (during which no contact occurs) or the observation of any practice or competition in which you participate.

8. Phone calls to you from college coaches may begin during your junior year in high school. Football coaches may call a prospect or the prospect’s family once during the month of May during the prospect’s junior year. Women’s basketball coaches may call a prospect or the prospect’s family once each month during the months of April, May, and June of the prospect’s junior year. All other sports are permitted one call in March of the prospect’s junior year.

   Following the completion of the prospect’s junior year, regular calls may begin — not to exceed one per week — on the following dates: June 21 (men’s and women’s basketball), September 1 (football), or July 1 (all other sports).

   Unlimited calls to you (or your parents or legal guardians) may be made under the following circumstances:
   • During the five days immediately before your official visit by the university you will be visiting;
   • On the day of a coach’s off-campus contact with you;
   • During the time beginning with the initial National Letter of Intent signing date in your sport through the two days after the signing date; and
   • In the sport of football only, during the permissible off-campus contact periods and during the 48 hours prior to and 24 hours after 5 a.m., on the initial signing date for the National Letter of Intent. Coaches also may accept collect calls, and universities are permitted to utilize a toll-free number to receive telephone calls from you (or your parents or legal guardians) on or after July 1 after completion of your junior year.

9. Letters to you from coaches are permitted beginning Sept. 1 at the beginning of your junior year in high school. A Division I university may provide you with the following printed materials. These following materials must be sent via regular first-class mail service:
   • General correspondence, including letters, U.S. Postal Service postcards and institutional note cards;
   • Game programs which may not include posters and one Student-Athlete Handbook;
   • NCAA educational information;
   • Pre-enrollment information subsequent to signing a National Letter of Intent with the university;
   • One athletic publication (media guide or recruiting brochure);
   • Official academic, admissions and student services publications published or videotapes produced by the institution and available to all students;
   • Schedule and business cards;
   • Questionnaires which may be provided prior to your junior year; and
   • Camp brochures, which may be provided prior to your junior year.

10. An “Official Visit” is a visit by a prospect to a college where the college pays for some or all of the prospect’s expenses. These expenses may include transportation, lodging, meals, and/or entertainment. Official Visits are permissible once a prospect has started senior classes.

   The purpose of the compliance office is to make you aware of all relevant NCAA rules and make sure that you know how to remain eligible. Your eligibility, however, is ultimately in your own hands. This page is a quick-reference guide to provide a basic understanding of NCAA rules. It is not all-inclusive, but rather a tool to help you avoid inadvertent involvement in a violation of NCAA legislation. We encourage you to always ASK BEFORE YOU ACT. Please contact the Virginia Tech Compliance Office if you have any questions at (540) 231-2937 or (540) 231-5497.
